## Product Description [Enquire about this product](#)

Buckle aluminium cable clips fasten bunched cables, pipes or hoses by wrapping the aluminium arms around them. One arm is passed through the buckle on the other arm and then bent over for secure protection against loosening.

The self-adhesive backing provide a versatile solution. They are quick & easy to use thereby saving time and labour costs.

No special tools are required - simply peel off the backing tape, stick to a suitable surface, then bend to the required shape.

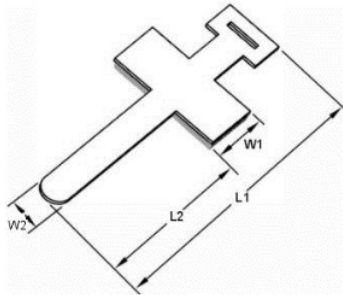

The standard products offer reliable, long-lasting adhesion - ask us for special adhesives for difficult environments.

A wide range of colours are available to special order (can be Anodised or Polyester-coated) and embossed printing is available for a small tooling charge (subject to minimum order quantity).

C = Maximum Cable Diameter.

Materials - Aluminium, Self-Adhesive Polyester Foam.
