

COLOURED FOAM PVC SHEET

Foamalux, the world's leading rigid foam PVC sheet has a renowned reputation for ultra smooth and consistently even surfaces. Its quality, flawlessness and versatility offers the designer unlimited application possibilities in the creation of interiors, shop outfitting, signage, contemporary displays, product design and fabrication. Choose from an extensive choice of 15 vibrant colours (strawberry red, red, orange, sunburst yellow, yellow, ivory, green, blue, light blue, grey, black and 4 Limited Edition colours neon pink, neon green, raspberry, black sparkle) plus bright white which gives the best colour interpretation in digital printing and UV curing. All 1-19mm white sheets have a bright smooth surface for true colour interpretation.

OPTIONS

- Thicknesses: 1-24mm in white, 3 & 5mm colours*
- Colours : 15 strong, vibrant colours & bright white (specials available on request)

WHITE	COLOURS
I, 2, 3, 4, 5, 6, 8, 10, 13, 19 & 24mm	3 & 5mm**
2, 3, 5 & 10mm	-
2, 3, 4, 5, 6, 8, 10 & 19mm	-
2, 3, 4, 5, 6, 8 & 10mm	3 & 5mm
	1, 2, 3, 4, 5, 6, 8, 10, 13, 19 & 24mm 2, 3, 5 & 10mm 2, 3, 4, 5, 6, 8, 10 & 19mm

* Limited Edition colours are available in 2050x3050 and 3mm
** Not all colours are available in 1220x2440 as standard, please contact us for details

MAIN BENEFITS

- Consistently even, offers an optimum surface for print and lamination
- I5 strong, vibrant colours in addition to bright white
- Self coloured
- Lightweight easy to handle and install
- Suitable for direct to substrate digital printing
- Easy to cut, fabricate, glue and bond
- Suitable for 3D displays
- Versatile
- Excellent resistance

APPLICATIONS

The entire range offers superb screen printing, direct to substrate digital printing, outstanding surface adhesion for vinyl and graphic applications. It is extremely formable and can be cut, bent, and thermoformed successfully. The diversity and variation of applications for Foamalux are endless, it has been used for:

- Shop outfitting, exhibition stands and displays
- Signage and point of purchase/sale
- Fabrication
- Direct digital printing
- Vinyl application and photo mounting
- Screen printing

PRODUCT RANGE

	PRODUCT RANGE	
	PRODUCT	PRODUCT DESCRIPTION
	Foamalux Colour	Extruded foam PVC sheet (unplasticised) available in a vibrant palette of bright white and 15 colours
	Foamalux White	Extruded foam PVC sheet (unplasticised) which optimises reproduction capabilities and UV stability to achieve outstanding print clarity and quality. Available in white only.
	Foamalux Ultra	Extruded foam PVC sheet (unplasticised) with a weatherable high gloss fi nish in white and 6 dynamic colours
	Foamalux Xtra	Co-extruded foam PVC sheet (un-placticised) with a black recycled core and co-extruded white surface

FABRICATION

The Foamalux range provides versatile, self-coloured material with a high strength to weight ratio that can be easily worked with using basic wood and metal working tools and easily transported due to its lightweight nature.

Cutting – using a cutting knife or a straight, finely serrated blade mounted on a hand-saw, band saw, disc (circular) saw or jigsaw. Sheets exceeding 3mm must be sawn. It is also suitable for sawing, drilling, milling, routing and guillotining.

Fastening – Panels can be fixed to supporting structures using screws, rivets, nails and adhesive.
Bonding – can be bonded to itself or other materials.
Drilling – can be drilled using any conventional drill.
Welding – either by hot air welding or butt welding.
Die Cutting – flat shapes with complex outlines can be die cut from thinner sheets.

CHEMICAL RESISTANCE

Foamalux rigid foam PVC, is resistant to most chemicals and atmospheric pollutants. Contact with solvents and wet wood preservatives must be avoided. See technical guide for full information details.

Tel +44 (0) 28 9084 9999 Fax +44 (0) 28 9083 6666 mail@brettmartin.com www.brettmartin.com

THERMOFORMING

Components which are relatively simple and shallow in form are thermoformable from Foamalux. An elastic state is reached between the temperature range 115-130°C.

Folding - can be folded on a simple jig fitted with a forming tool having a radius of about two and a half times the sheet thickness.

Draping – by softening a panel to an elastic state, draping over an appropriately shaped pattern and retaining it until cooled and rigid.

INSTALLATION

Applications of Foamalux must make adequate allowance for thermal movement. Sufficient clearance must be allowed if holes are drilled for fixing and in rebates of support frames. For further guidelines on usage or installation instructions, please refer to the Foamalux product guide.

WEATHER & UV RESISTANCE

Foamalux can be used for a number of short term exterior applications. Black, white and grey have the greatest colour retention while that of red and yellow is lesser. Applications most shaded from direct sunlight will retain colour longest.

Climate, location and project specifications should be taken into account when considering Foamalux foam PVC for outdoor projects.

FIRE PERFORMANCE

Foamalux has been independently tested to various European Fire Test Standards. Contact the technical department for the most up to date certification.
